ALULINE - Extra light! Variation aluminum handle and aluminum shovel

Classically light aluminum shovel meets aluminum handle and creates the solid aluminum PROFI models. The handles are coated with a cold-resistant non-slip plastic. Depending on the model there is a choice between noise-deadening edge for extra-quiet use or a riveted shaped steel edge. Each model is equipped with the ergonomic plastic D-handle and two models have a handle in special shape for an extremely back-friendly posture.

The new Range ALULINE – REFLECTION

Safety through Visibility!

Resists temperatures down to minus 20°C

Garantie 5 Jahre, Years

Safety through Visibility!

The new FREUND plastic snow shovel „REFLECTION“ range is characterized by its bright colour and reflective component and is ideal for using in darker seasons. Depending on which item you select, the handle, plastic blade and brushes are a neon yellow colour and the high-oval shaft is equipped with a light-reflective coating. Due to its eye-catching colours and light reflection, it provides perfect visibility when used in the dark near busy traffic!

ALULINE - Extra light! Variation aluminum handle and plastic shovel

Snow clearing without any effort! The connection of extremely light aluminum handle and plastic pan ensures extremely power-saving work. The handles are coated with a cold-resistant non-slip plastic. Depending on the model there is a choice between noise-deadening edge for extra-quiet use or an aluminum profile edge. Each model is equipped with the ergonomic plastic D-handle and two models do have a handle in special shape for an extremely back-friendly posture.

Effective and space-saving!

The new plastic snow shovel offers perfect length and working width to clear snow efficiently.

Extremely space-saving when folded, makes it much easier to store at home, in the tool shed or in the workshop. It is also an ideal companion for taking in the car and for winter camping. Folding mechanism and blade are made of sturdy plastic and are cold-resistant even at low temperatures.

Classic, Tried and Tested!

The tried and tested snow cleaners with road salt resistant plastic pan and wooden handle - classic quality!
 The particularly fine surface of the shovel material prevents the snow from sticking to the shovel. The raised shovel side edge of each model offers a good snow-bearing and provides effective snow clearance.

From Plastic Bottle to Glove!

Climate change, pollution of our oceans, and the consumption of fossil resources are a global problem.

We, Freund Victoria Gartengeräte GmbH, also want to play our part in putting a stop to these trends, and in maintaining the earth in its present form.

This is why we, together with well-known manufacturers, have developed a sustainability concept for gloves:

Concept

Our approach is not merely restricted to the gloves themselves; instead it goes a step further. It includes:

Recycled fibres

The textile fibres of those THINKGREEN gloves are made of 100 % recycled polyester.

Sustainable paper

We take the 4-pillar approach:

- Avoid • Reduce
- Reuse • Degradable

Packaging materials must be harmless for humans and organisms as well. We make every attempt to forgo the use of excessive packaging. Our suppliers have succeeded in obtaining their certification according to FSC-STD-10-004. In order to trace to the source, the certificate number accompany the FSC logo. The cardboard used for product and transport packaging consists of 100 % recycled material.

Plastics-free adhesive tapes

Instead of the usual plastic adhesive tapes, specially manufactured paper adhesive tapes are used. These contain 70 % paper, 12 % natural fibres, and 18 % amylose.

Green dyes

Traditional printings are based on toluene, xylene, industrial alcohols, and other volatile organic compounds, and are extremely harmful to the climate and water. In contrast to this, for our gloves in the THINKGREEN series, environmentally friendly, water-based dyes are used exclusively.

Biologically degradable plastic bags

The plastic bags consist of biologically degradable material (including maize starch and cellulose), and in a natural environment they degrade within 6 months, due to the effects of moisture and light. That's why we are happy to accept a somewhat milky appearance.

Free of harmful substances

Your health matters to us. That's why the THINKGREEN gloves are annually tested on harmful substances year by the Institute Hohenstein against an extensive set of criteria based on Öko-Tex Standard 100. Rest assured of the compatibility of the gloves, both for wearers and the environment.

Quality and user comfort

The optimum fit and soft, elastic coating are convincing in everyday and professional use. The gloves are CE-tested according to standard EN388 by notified bodies. THINKGREEN gloves are characterised by high abrasion resistance.

4121 X

Accompany us on our journey

From plastic bottle to glove

2.6 recycled plastic bottles are equivalent to 1 pair of ThinkGreen gloves

Gloves Allround Winter, size 7 THINKGREEN series
Seamless fine-knitted gloves made from 100 % recycled polyester, green-white, optimum fingertip sensitivity and perfect fit, coating made from elastic latex foam, particularly good grip due to permeable surface, **Thick fabric lining for protection against the cold**, suitable for work in agriculture, logistics or in the garden
